

18 February 1970

MEMORANDUM FOR: Director of Security

SUBJECT : Office of Security Statistical
Report for JANUARY 1970

1. The attached tables reflect some of the activities of certain components of the Office of Security during January 1970.

2. The statistics in the tables are compiled by the component concerned and refer to the current month.

3. The overall processing time for an applicant case for January 1970 remained the same as for December 1969--95 days. The high processing time is caused primarily by a continuing shortage of typists at [REDACTED] resulting in a larger than normal backlog of untyped reports and the resulting effect upon closing cases. There has been some improvement in the situation and it is hoped that there will be a reduction in the processing time during the coming months.

4. Total overt cases received during the month was 2052, an increase of 637 cases over December 1969. The increase may be attributed to the receipt of 124 applications for summer employment and an increase in Industrial Security type cases from 230 in December 1969 to 639 for January 1970. The latter increase is primarily a seasonal occurrence reflecting a return to normalcy following the Christmas holidays.
